For-A HVS-300HS video production switcher

Avitech 24 input Rainier multiviewer

Miranda CR3232 32x32 3G HD-SDI router

Chyron Lyric Graphics

With the help of PatchAmp's [System Integration Group](#), Four Village Studio has upgraded their studio from analog to digital. PatchAmp built the [4VS](#) analog system 13 years ago and they chose PatchAmp again to quickly and easily upgrade their infrastructure with the use of PatchAmp's Lite System. This reduced the amount of time needed to upgrade their system and allows for future upgrades to be integrated seamlessly.

Four Village Studio, located in Floral Park, NY, is a government access television facility producing community interest programming made by and for residents in the Four-Village area.

4VS programs attempt to inform, educate and entertain viewers while promoting the diverse talents and contributions of community groups, organizations and individuals.
