

NBC Universal

Project

2012 London Olympics

Application

Flypack Production System

### Technology At Work

**PatchAmp** 2 3200 Lite System and  
64 PA901 3G HD Modules

**Sony** MVS-8000 video production  
switcher

**Miranda** Kaliedo modular multiviewer

**Miranda** 128x128 3G HD-SDI router

[NBC Universal](#) will be using the [PatchAmp Lite System](#) at the 2012 Summer Olympics in London. The PatchAmp system was chosen to simplify the flypack design. The PatchAmp system, along with all the cables, interconnect wiring and labeling was handled by [Systems Integration Group](#) before being sent to NBC Olympics warehouse in Connecticut for final assembly.

The PatchAmp 3200 Lite Systems reduces the amount of cables used, the amount of time needed to install and the weight of the flypack. The flypack system has been installed in London in preparation for the 2012 Summer Olympic games.

NBC Universal is an American media and entertainment company engaged in the production and marketing of entertainment, news, and information products and services to a global customer base.
